
Auto Water Slot Milling Machine LXCA-60 LXC01-2 LXC01-3 LC01-4

➤ **Function:**

Milling all kinds of water slots and air pressure balance grooves.

➤ **Features:**

Full design with high rigidity, processing beautiful water slot, high appearance quality.

Automatic cutter changer on the under head, one time clamp, two end water slots processing.

High efficiency, suitable for mass production.

Special feeding system, need no special maintenance, high milling quality.

Convenient adjustment for the cutter location to meet different kinds of profiles.

Water slot milling length adjustable within 100mm, wide adaptability.

Adopt linear bearing motion to ensure the processing precision.

➤ **Parameter:**

Air Pressure:	0.5MPa~0.8MPa
Air Consumption:	30L/min
Input Voltage:	220V 50Hz
Input Power:	1.14KW
Main-shaft Revolution:	25000r/min
Cutter Diameter:	5mm 8mm
Slot Length:	0~100mm
Overall Dimension:	1200mmx1200mmx1800mm
Weight:	300kg
