### Mullion Saw SJVA-55

➤ **Function:**

Used for V-shaped mullion cutting.

➤ **Features:**

Two saw blade with 90° layout, one time two V shape cutting, high cutting precision and efficiency.

Horizontal structure and stable running for high cutting precision.

Patent technology to prevent collapse during cutting procedure.

Waste profile only produced in saw estuary, high utilization.

➤ **Parameter:**

Air Pressure:	0.5MPa~0.8MPa
Air Consumption:	30L/min
Input Voltage:	380V 50Hz
Input Power:	3KW
Spindle Rotary Speed:	2800r/min
Cutting Height:	110mm
Cutting Width:	120mm
Cutting Length:	300mm~2100mm
Overall Dimension:	7500mmx1720mmx1390mm
Weight:	300kg
